

Rozol Prairie Dog Bait Stewardship

Summary Highlights & Information Resources

It is a violation of Federal law to use Rozol Prairie Dog Bait in a manner inconsistent with the [label](#). The summary below is not a substitute for the **LABEL** as more restrictions than those noted below apply. Have the **LABEL** in possession when applying Rozol Prairie Dog Bait.

- **USE IS PROHIBITED TO PREVENT EXPOSURE TO ENDANGERED SPECIES.** Cannot be applied within:
 - All black-footed ferret reintroduction areas, including on some Indian reservations:
 - Exterior boundaries of the Crow or Blackfeet Reservations in Montana.
 - Exterior boundaries of the Ft. Belknap, or Northern Cheyenne Reservations in Montana.
 - Exterior boundaries of the Cheyenne River, Lower Brule, or Rosebud Reservations in South Dakota.
 - Northern Aplomado Falcon areas (*11 counties in NM & 24 counties in TX, as of 9/17, ECOS Database, USFWS*)
 - If in southern New Mexico, Phone USFWS: 505-346-2525 prior to baiting.
 - If in southwestern Texas, Phone USFWS: 817-277-1100 prior to baiting.
- **Consult** EPA's Bulletins Live! Two Website: <https://www.epa.gov/endangered-species/bulletins-live-two-view-bulletins> for the latest information, *within 6 months of application and for the month of planned application*.
 - Apply ¼ cup, AT LEAST 6 inches down active burrows
 - Bait between October 1 and March 15th, *unless otherwise specified*.
 - Delayed start in Preble's Meadow Jumping Mouse areas: *11/1 (CO & WY)*
 - Delayed start date in Grizzly Bear habitat: *Montana - start: 12/1, early end date: 3/1.*
- Use line-transects to establish pre-baiting and carcass search assessments. *Maximum 200 ft. per pass. Travel transects at a rate not to exceed 4 mph.*
- The label requires one search per day every 1-2 days for at least 2 weeks (14 days) and longer if carcasses are still being found; however, the U.S. Fish and Wildlife Service recommends twice-daily searches: mornings and evenings, over the same duration required by LABEL.
- Grazing: After 14 days
- Reapplication: If activity is observed after several weeks or months, a 2nd application may be made.
- Different anticoagulants may not be used during the same use season.
- **NOTIFICATION REQUIREMENTS**
 - **National Pesticide Information Center** if any dead or dying nontargets are found, leave in place and immediately call : **800-858-7378** or text **npic@ace.orst.edu**
 - If apparently injured or sick, federally-listed **Endangered Species** are found, these must be reported to:
 - **303-236-7540** (for CO, KS, MT, ND, NE, SD, & WY); or
 - **505-248-7889** (for, NM, OK or TX).
 - If **Black-footed Ferrets** are found during application or carcass searches, call ASAP: **970-897-2730 x 224**
- Promptly handle all prairie dog carcasses according to label directions:
 - Burial on-site in holes dug at least 18 inches deep, or in inactive burrows.
 - Burial includes packing the hole with soil to avoid scavenging.
