

Snail Control: *Know Your Baiting Points*

Metarex has over 100,000 more baiting points per acre for more snail killing power!

Snail bait pellets are not equal... Metarex, delivers greater value!

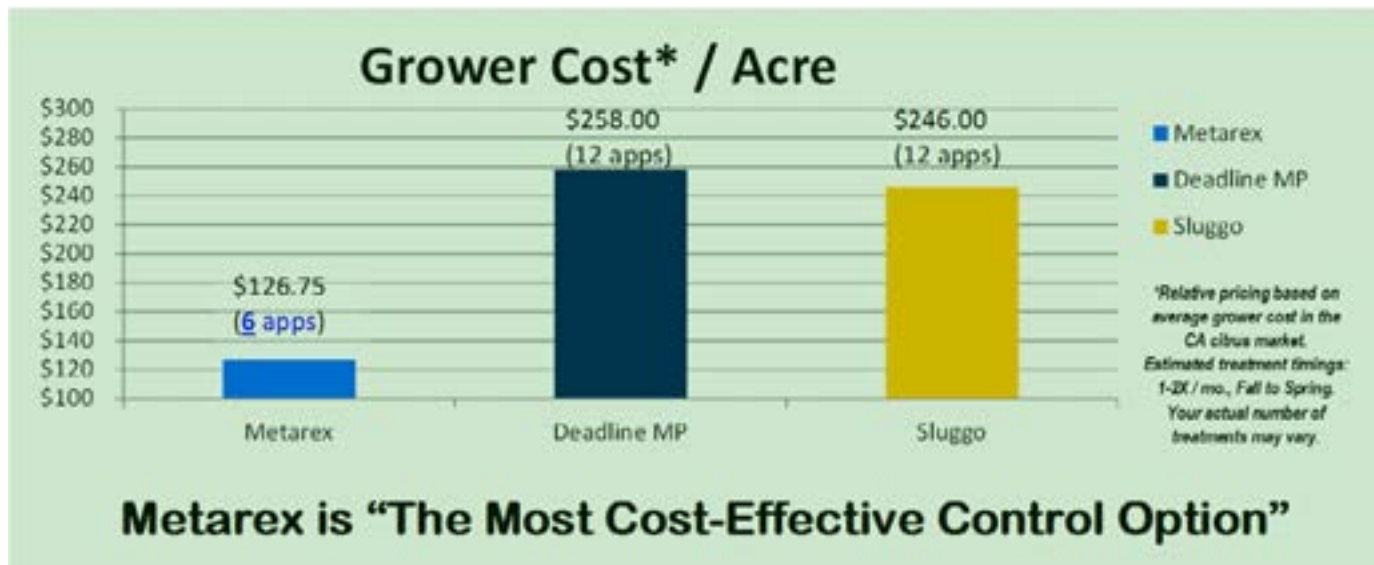

It Lasts Longer

- Only Metarex is labeled for treatment intervals up to 4 weeks (under normal rainfall).
- Longer treatment intervals, lower your snail control program costs.
- Metarex lasts longer, by re-hardening after rain or irrigation.

Fewer applications = The low-cost snail control program

Unique Homogenous Formulation - Every Bite Kills Snails

- Metarex lasts longer in the grove due to its unique wet process mfg. which places active ingredient into every bite a snail takes.
- Wet process uniquely blends active ingredient, mold inhibitors, and food-grade attractants throughout each baiting point - causing death to more snails.
