PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements: Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet, and changing into clean clothing.

ENVIRONMENTAL HAZARDS: This product is extremely toxic to mammals and birds. Dogs, cats and other predatory scavenging mammals and birds might be poisoned if they feed on animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinse.

FIRST AID: Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice. Treatment for Pet Poisoning: If animal eats bait, call veterinarian at once. NOTE TO PHYSICIAN OR VETERINARIAN: Contains the nerve poison bromethalin. This is not an anticoagulant type rodentide. For humans or animals ingesting bait and/or showing obvious poisoning symptoms (muscle tremors, loss of limb use, or seizures), limit absorption by emesis or gastric lavage. Seizure symptoms, if present, result from cerebral edema and should be treated accordingly with osmotic diuretics and corticosteroids.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of in trash or at an approved waste disposal facility. Container Handling: Nonrefillable container. Do not reuse or refill this container. Completely empty container before discarding. Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target animals, or birds may access the bait. USE RESTRICTIONS: This product can only be used to control Norway rats, roof rats, house mice, Cotton rat* (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humulis), Golden mouse* (Ochrotomys nuttali), Pallid rat* (Rattus rattus), Meadow vole* (Microtus pennsylvanicus), White-throated woodrat* (Neotoma albigula), Southern plains woodrat* (Neotoma micropus), and Mexican woodrat* (Neotoma mexicana) in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings, and related structures around and associated with these sites. Fence and perimeter baiting beyond 100 feet from a structure, as defined above, is prohibited. Do not sell this product in individual containers holding less than 4 pounds of bait. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, feed or feed handling equipment, or milk or meat handling equipment. Do not apply directly to food or feed crops. Do not broadcast bait. Burrow baiting with this product is prohibited. “Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polyzona rat* (Polyzona abigla), Southern plains woodrat* (Neotoma micropus), and Mexican woodrat* (Neotoma mexicana) and Mexican woodrat* (Neotoma mexicana).”

Selection of Treatment Areas: Determine areas where rats and/or house mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors or walls, beside burrows, or in locations where rats and/or house mice or their signs have been observed. Remove as much alternative food as possible. APPLICATION DIRECTIONS: The active ingredient in this product is different from anticoagulant rodenticides. Individual rats and mice typically feed less or cease feeding altogether after consuming a toxic dose. Bait may be removed from pouch and placed in a feeding device that secures the unwrapped bait in a bait station. Discard empty wrapper in trash. House Mice: Apply 1 to 2 pounces per placement, usually spaced 8 to 12 feet apart. Up to 4 pounces may be needed at points of very high house mouse activity. Rats: Apply 4 to 24 pounces per station, usually spread 15 to 30 feet apart. Adjust the amount of bait applied to the level of rat feeding expected at each bait placement. Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less with bromethalin baits than the anticoagulant baits. Although one night’s feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased. Follow-up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all visible dead animals and leftover bait, as well as any bait that has become accessible to non-target animals. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

Liphatech, Inc.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL and follow all use directions and precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife.
3. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinse.

KILLS NORWAY RATS, ROOF RATS, HOUSE MICE, AND ANTICOAGULANT-RESISTANT RATS AND HOUSE MICE

KILLS OTHER RODENT SPECIES AS LISTED ON THIS LABEL

NORWAY RATS AND HOUSE MICE MAY CONSUME A LETHAL DOSE IN ONE NIGHT’S FEEDING BUT IT MAY TAKE TWO OR MORE DAYS FROM TIME OF BAIT CONSUMPTION FOR THEM TO DIE

DUE TO STOP FEED ACTION, RODENTS TYPICALLY FEED LESS OR CEASE FEEDING ALTOGETHER AFTER CONSUMING A TOXIC DOSE

Active Ingredient: bromethalin ........ 0.01%
Inert Ingredients ................. 99.99%
Total .................................. 100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See side panel for additional precautionary statements.
