# TakeDown® II

Take Down Rodents Fast.

Rodenticide

PMPs now have two choices for taking down rodents.

An acute rodenticide, TakeDown® II is effective in fighting anticoagulant-resistant rodent populations and for controlling heavy infestations, especially those in commercial settings. TakeDown II is available in both soft bait and mini blocks.

Target pests include:

House Mice

Norway Rats

Roof Rats

## TakeDown II Mini Blocks

- 14g mini blocks are designed with rodent gnawing edges
- Blocks feature a center hole for securing on vertical or horizontal rods
- Active ingredient: bromethalin (100 ppm)
- Available in 4 lb. bags (case of 4-4 lb. bags)

## TakeDown II Soft Bait

- 8g pouches ideal for use with vertical or horizontal rods and SST
- Soft bait maintains palatability and integrity in hot environments
- Active ingredient: bromethalin (100 ppm)
- Available in 4 lb. bags (case of 4-4 lb. bags)
