

Insect Concentrate
FIFRA 25(b) Exempt

Safe for People, Pets and the Environment*

Peritect 360 IC is a laboratory-tested, FIFRA 25(b) exempt solution that's effective against crawling and flying insects such as bedbugs (adults & nymphs), ants, fleas and mosquitoes. The EPA has determined that FIFRA 25(b) exempt insecticides pose little to no risk to human health or the environment.*

360° Protection

Full perimeter of defense for indoor/outdoor use*:

- Helps protect children and pets inside the home
- Safeguards surrounding environment of homes and offices
- Defends public spaces with an environmentally conscious solution
- Guards businesses from a wide spectrum of pests and insects

From the Experts

Liphatech has provided effective pest control solutions for almost 80 years. Now our experience and innovation bring you an effective laboratory-tested FIFRA 25(b) exempt insect control solution. Peritect 360 IC is a broad-spectrum insecticide concentrate that is effective against crawling and flying insects. It combines the expertise of Liphatech with a formulation that meets the rising demand for environmentally conscious pest control.

Broad Spectrum Insect Control

Peritect 360 IC can be used in fogging and automatic spray systems (except in CT) for active infestations and maintenance of crawling and flying insects:

- Flies
- Mosquitoes
- Fleas
- Ants
- Spiders
- Cockroaches
- Bed Bugs (Adult & Nymph)

A Minimum Risk Product That Makes Business Sense

Expand your pest control business by offering environmentally conscious customers a FIFRA 25(b) exempt minimum risk insect control product that delivers effective protection for their families, businesses and the environment.* Peritect 360 IC is an easy mixing, liquid concentrate with the active ingredients geraniol, sodium lauryl sulfate, cornmint oil and clove oil.

Geraniol 31.5%

Disrupts cell walls, membranes or organelles.

Sodium Lauryl Sulfate 14%

Strips the insect's outermost layer (cuticle), leading to desiccation.

Cornmint Oil 3.5%

Affects the nervous system of insects.

Clove Oil 3.5%

Kills insects that come into contact with it.

Inert Ingredients 47.5%

Water, ethyl lactate, soap, polyglyceryl oleate.

Fully Compliant with 25(b) Standards

Peritect is considered a FIFRA 25(b) minimum risk pesticide because its ingredients pose negligible risk to human health and the environment when used as directed.

For More Product Information

Peritect 360 IC is a liquid concentrate, packaged in convenient one-gallon tip 'n' measure bottles, with four gallons per case. It is safe (when used as directed) for use in sensitive locations including homes, daycare facilities, hospitals, hotels, offices, parks, restaurants and schools. Always refer to the label for complete dilution and application rate instructions per approved species, ensuring safe and effective use and storage.
